Education

CMR University, Bangalore

B.Tech in Computer Science and Engineering

Jul 2021 – Jun 2025

CGPA: 8.74

Delhi Public School, Siliguri

Class XII (CBSE)

Jul 2020 – Jun 2021

Grade: 87.3%

Experience

Privacy Advisor

Abine India Pvt Ltd

Jul 2025 – Present

Bangalore, India

- Reduced compliance risks across 100+ websites by implementing GDPR/CCPA-aligned data workflows, including automated data creation and deletion pipelines.
- Decreased post-release issues by 30% by collaborating with 5+ QA and engineering team members and delivering detailed, reproducible bug reports.
- Accelerated audit completion time by 25% by redesigning privacy workflows and improving cross-team communication processes.

Web Developer Intern

Prodigy InfoTech

Feb 2024 – Mar 2024

Remote

- Boosted mobile engagement by 25% and session duration by 20% by developing responsive UI using HTML, CSS, and JavaScript for industry keyword alignment.
- Reduced page load time by 30% by analyzing performance bottlenecks and implementing optimized asset loading strategies.
- Collaborated with designers to build scalable frontend components, improving UI consistency across devices.

Java Developer Intern

CodSoft

Jul 2023 – Aug 2023

Remote

- Engineered 4 modular Java applications using OOP principles, increasing maintainability and reusability by 30%.
- Resolved runtime issues by applying structured debugging and exception handling, improving application reliability.
- Enhanced application features by adding validation and logging systems, improving traceability and debugging efficiency.

Projects

EcoTrade: MERN Stack E-commerce Platform | MongoDB, Express.js, React, Node.js

- Built a full-stack MERN application using MongoDB, Express.js, React, and Node.js, handling 200+ transactions via REST APIs and scalable backend architecture.
- Increased user retention by 35% by implementing personalized recommendations and React UI components.
- Integrated CI/CD pipelines and Git workflows, enabling faster deployments and collaborative development for DevOps Familiarity.

AI Chatbot Integration | MERN, LangChain

- Integrated AI chatbot functionality into a MERN application using LangChain for AI Integration Experience, enabling real-time user query resolution.
- Connected backend APIs with frontend workflows to deliver seamless conversational experiences.

Employee Management System | Java, Spring Boot, MySQL

- Improved data retrieval speed by 40% by designing optimized SQL queries and RESTful APIs for 100+ records.
- Implemented role-based access control and JUnit testing, ensuring secure and reliable backend operations.

Event Ticketing Platform | Spring Boot, MongoDB, JWT

- Directed 1000+ concurrent users by designing scalable backend systems and JWT-based authentication.
- Reduced API latency by 60% through query optimization, indexing, and backend performance tuning.

Skills

Languages: Java, Python, JavaScript, SQL

MERN Stack: MongoDB, Express.js, React, Node.js

Frameworks: Spring Boot, REST APIs

DevOps & Tools: Git, GitHub, Docker, CI/CD Pipelines, Postman

Concepts: Data Structures & Algorithms, OOP, System Design, Agile
