Education

CMR University, Bangalore

B.Tech in Computer Science and Engineering

Jul 2021 – Jun 2025

CGPA: 8.74

Delhi Public School, Siliguri

Class XII (CBSE)

Jul 2020 – Jun 2021

Grade: 87.3%

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL

Full-Stack Development: MongoDB, Express.js, React.js, Node.js, HTML, CSS

Backend & Frameworks: Spring Boot, Spring Security, Maven, RESTful APIs

Databases: MySQL, PostgreSQL, MongoDB, AWS S3

DevOps & Tools: Git, GitHub, Docker, CI/CD Pipelines, Postman, AWS, Azure, Eclipse IDE, Canva

Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), System Design, Agile Methodology

Experience

Privacy Operations Engineer

Abine India Pvt Ltd

Jul 2025 – Present

Bangalore, India

- Architected an automated PII detection and removal pipeline in Python targeting 75+ data broker platforms, replacing a fully manual opt-out workflow with Celery-orchestrated task automation and Playwright-driven browser execution.
- Developed a site-registry-driven scraping system (Playwright + BeautifulSoup) with per-site scripted adapters, LLM browser-agent fallback, and automated health monitoring, enabling new broker onboarding via config rather than code.
- Engineered a deterministic bit-scoring matching engine with an immutable PostgreSQL audit log and AWS S3 evidence capture, generating GDPR- and CCPA-aligned removal records and AI-grounded customer reports through a confidence-tiered human review queue.

Web Developer Intern

Prodigy InfoTech

Feb 2024 – Mar 2024

Remote

- Developed responsive UI in HTML, CSS, and JavaScript, boosting mobile engagement by 25% and session duration by 20%.
- Diagnosed performance bottlenecks and optimized asset loading, reducing page load time by 30%.
- Engineered scalable frontend components with designers, achieving consistent UI across 5+ device breakpoints.

Java Developer Intern

CodSoft

Jul 2023 – Aug 2023

Remote

- Architected 4 modular Java applications using OOP principles, increasing code reusability by 30%.
- Eliminated critical runtime errors via structured debugging and exception handling, improving stability by 20%.
- Instrumented validation and logging systems, reducing traceability gaps and cutting debugging time by 25%.

Projects

EcoTrade: MERN Stack E-commerce Platform | MongoDB, Express.js, React, Node.js

- Architected a full-stack MERN platform, processing 200+ transactions via scalable REST APIs.
- Increased user retention by 35% by delivering personalized recommendations through React components.
- Configured CI/CD pipelines and Git workflows, cutting deployment cycles by 40% across the team.

AI Chatbot Integration | MERN, LangChain

- Embedded LangChain-powered AI chatbot into MERN stack, enabling real-time resolution of user queries.
- Bridged backend APIs with frontend workflows, achieving sub-200ms end-to-end conversational response times.

Employee Management System | Java, Spring Boot, MySQL

- Accelerated data retrieval by 40% by optimizing SQL queries and RESTful APIs for 100+ records.

- Secured backend using role-based access control and JUnit tests, achieving 95% test coverage.

Event Ticketing Platform | Spring Boot, MongoDB, JWT

- Scaled backend to support 1000+ concurrent users by implementing JWT-based authentication and load-aware design.
- Slashed API latency by 60% through query optimization, indexing, and targeted backend performance tuning.

Certifications

- Microsoft Certified: Azure AI Fundamentals (2023) [Link.](#)
- Infosys Springboard: Artificial Intelligence Virtual Internship (2025) [Link.](#)
- Oracle University: Cloud Infrastructure 2025 Certified Generative AI Professional [Link.](#)
- Oracle Dev Gym: Databases for Developers - Foundations [Link.](#)

Publications

- **“Web Application for Mobile Purchase and Eco-Friendly Trade-Ins”** *IJCRT, April 2025*
Published research on a sustainable MERN-based e-commerce platform integrating AI-driven mobile trade-in recommendations and blockchain-enabled cryptocurrency payments to promote secure, eco-conscious circular economy practices.
